

Console H2O

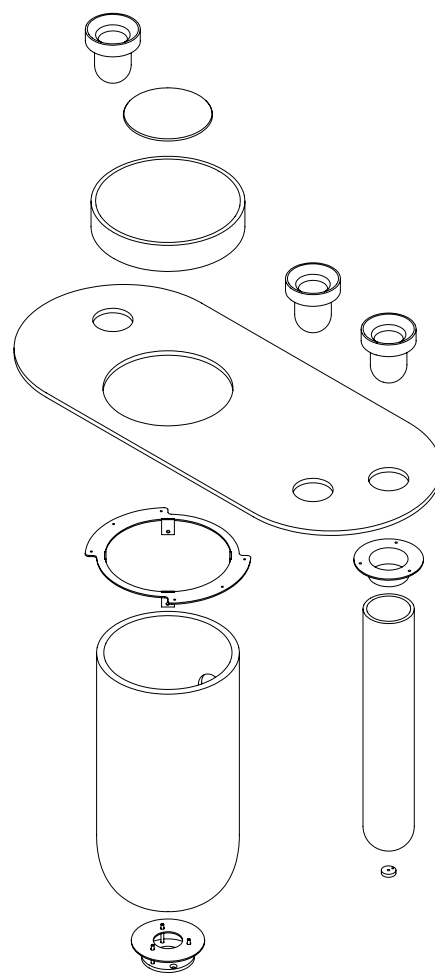

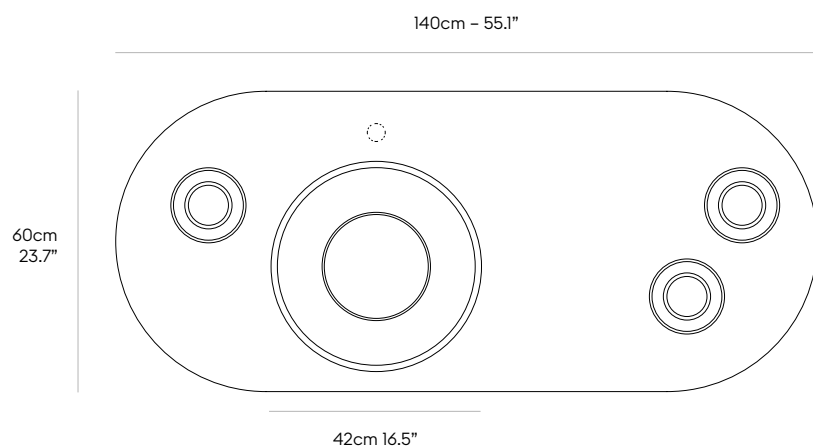

Console H2O consists of two floor-mounted ceramic structural elements: a larger one serving as a washbasin, and the other as an accessory. Completing the design is a series of suspended ceramic containers. The entire composition is framed by a thin corrugated aluminium top coated in resin. Available in all finishes and earth tones, it is designed for either floor or wall drainage. The numerous storage elements add versatility and functionality, while its compact dimensions make it ideal for the residential, contract, and hospitality markets.

La Console H2O è composta da due elementi strutturali in ceramica fissati a terra: uno, più grande, utilizzato come lavabo, l'altro come accessorio. A completare il design, una serie di contenitori sospesi in ceramica. Il tutto è intersecato da un sottile piano in alluminio grecato rivestito in resina. Disponibile in tutte le finiture e terre, è progettata per lo scarico a terra o a parete. I tanti contenitori aggiungono versatilità e funzionalità. Le sue dimensioni compatte la rendono ideale al mercato residential, contract e hospitality.

Mix & match

The finishes of the top and the clays of the ceramic elements can be freely combined.

Le finiture del piano e le terre degli elementi in ceramica possono essere abbinate liberamente

Care instruction

In order to preserve the appearance and durability of product, never use abrasive sponges, hydrochloric or acetic acids, ammonia or metal silicates.

Per preservare l'aspetto e la durata del prodotto, non utilizzare mai spugne abrasive, acidi idroclorici o acetici, ammoniaca o silicati metallici.

Uniqueness

All our pieces are wheel-thrown by hand: slight variations in shape, size, and weight are natural characteristics of artisanal craftsmanship.

Tutti i nostri pezzi sono torniti a mano: eventuali leggere variazioni in forma, dimensioni e peso sono caratteristiche naturali della lavorazione artigianale.
